Schedule Update - 47⁰ North Supplemental Environmental Impact Statement

The City of Cle Elum's consultant team and Sun Communities are working on their plans and studies for the 47⁰ North project and Supplemental Environmental Impact Statement (SEIS), and we wanted to inform the community of some changes to the anticipated schedule. The original schedule, which we shared at the scoping meeting in October 2019, has slipped by a couple of months. Such delays are quite common for large master plan projects where there is considerable public interest, and in view of the detailed planning and studies that are required. Currently, the City anticipates that the Draft SEIS will be published in early/mid-summer 2020, and the Final SEIS in late fall of this year. These schedules are subject to change, so check back with the website periodically. Public notices will be published when documents are ready for publication or meetings are scheduled.

For more information check the project website: <http://cityofcleelum.com/city-services/administrative-services/public-notice/proposed-47-north-project/>
